

INSTRUCTIONS

1. GitHub Repository Submission Instructions

Group team leaders are required to commit all group work to the assigned GitHub repository:

Each student is expected to:

- Copy the respective group task link from the GitHub repository
- Paste the link into a Word document

The Word document must contain the following details:

- Group Name
- Student Name
- Student Registration Number
- GitHub Repository Link

Ensure that you submit the file as a PDF.

2. Presentation Instructions

For presentations, each milestone will cover two weeks or more. Every group is required to prepare a half-page summary for each week covered in the milestone.

During the presentation:

- Begin by explaining the concepts learned in each week summary.

Example:

- Week 1 covered concepts ABCD
- Week 2 covered concepts ABCD
- After explaining the concepts, demonstrate how those concepts were implemented in your project/system.

Presentations will be conducted for all sprints. Therefore, ensure that your work is well summarized, clear, and organized so that each group presentation can be completed within 20 minutes.
